

COGNITIVE PULSE · PORTFOLIO DECISION

AI Use-Case Portfolio

A working record of the opportunities, evidence and dependencies behind your current sequence.

Generated September 14, 2026

Result · 2 opportunities reviewed

Recommendations remain method-specific: score totals support comparison, while threshold rules determine Stop, Innovate, Demonstrate or Activate.

Answers remain on this page and are represented in the following evidence record.

Portfolio criteria

Each opportunity is scored on a 1–5 planning scale. These are not market benchmarks, probability certification.

Value & Impact: **Marginal** ? **Transformational** (Strategic and economic return.) · Feasibility: **Unproven** ? **Production-ready** (Data readiness and technical maturity.) · Time to Evidence: **Quarters** ? **Days** (Speed to prove value.) · Adoption Friction: **High Disruption** ? **Seamless** (Workflow disruption.) · Control & Compliance: **Critical Risk** ? **Standard Controls** (Risk and compliance overhead.) · Reuse Potential: **Isolated** ? **Foundational** (Component or agent reuse.)

Current opportunity record

01 · Customer onboarding evidence extraction · Demonstrate · 21 / 30

Reduce onboarding review time with governed document extraction and human approval.

[illegible]

COGNIRISE PULSE · USE-CASE-PRIORITIZATION

owner. • Caveat: API access to the legacy core banking system is undocumented and notoriously unstable.

Interpretation

Customer onboarding evidence extraction • Demonstrate

Significant adoption or control constraints require proving the capability in a restricted environment first.

Suggested delivery entry: IDAO stage review

Legacy service assistant • Stop

Low strategic or economic value does not justify the investment.

No delivery entry is recommended until the stop condition changes.

Next steps

01 Record uncertainty as a caveat and revisit a score when evidence, dependencies or ownership change.

02 Bring the highest-value, best-evidenced opportunity to a separate Value Scan if a facilitated proof is useful.

03 Use Agent Authority separately when a consequential handover exists; Control Burden is not an authority ceiling.

Privacy and limitations

This is a transparent comparative planning tool, not a financial business case, ROI calculator or roadmap-tool package.

Answers and free-text opportunity evidence were generated locally from this page and are not sent to Cognirise.
