

COGNIRISE PULSE · HANDOVER ASSESSMENT

Agent Authority Control Brief

Rebooks a disrupted passenger and issues a boarding pass.

Generated September 14, 2026

Result · Action handover · E3

The requested authority is above the calculated ceiling and is valid only when carried by the approved artefact or control.

Answers remain on this page and are represented in the following evidence record.

Calculated authority

Reversibility

R2 · We undo it ourselves, inside a known window.

Reach

H3 · A record a regulator can inspect.

Exposure band

E3

Permitted ceiling

In the loop

Requested authority

On the loop, with a stated intervention window

Comparison

Above the ceiling; approved artefact required.

Operating controls

Accountable owner

Duty Manager

Intervention window

Within two minutes

Promotion evidence

500 consecutive rebookings with zero disputed reversals.

Automatic demotion

Any involuntary downgrade or caused missed connection.

Additional artefact / control

Approved rebooking whitelist

Control instruction

Permit this action handover no further than in-loop. The requested authority is only valid when carried by the approved Approved rebooking whitelist. The Duty Manager owns promotion evidence and must demote authority automatically when: Any involuntary downgrade or caused missed connection.

Next steps

- 01 Carry this control brief into the operating design for the one assessed handover.
- 02 Reassess when the reach, reversibility, intervention window, artefact or accountable role changes.
- 03 Repeat the assessment for every other consequential handover; this brief does not set a ceiling for an entire agent.

Privacy and limitations

The questionnaire, calculation, exposure bands and authority rules are the approved Agent Authority Model and are unchanged.

This report was generated locally from this page. Answers were not sent to Cognirise or stored in the browser.

Method version: Agent Authority Model · current public questionnaire.
