

COGNIRISE PULSE · PORTFOLIO DECISION

AI Use-Case Portfolio

A working record of the opportunities, evidence and dependencies behind your current sequence.

Generated September 14, 2026

Result · 1 opportunity reviewed

Recommendations remain method-specific: score totals support comparison, while threshold rules determine Stop, Innovate, Demonstrate or Activate.

Answers remain on this page and are represented in the following evidence record.

Portfolio criteria

Each opportunity is scored on a 1–5 planning scale. These are not market benchmarks, probabilities or a certification.

Value & Impact: Marginal - Transformational (Strategic and economic return.) · Feasibility: Unproven - Production-ready (Data readiness and technical maturity.) · Time to Evidence: Quarters - Days (Speed to prove value.) · Adoption Friction: High Disruption - Seamless (Workflow disruption.) · Control Burden: Critical Risk - Standard Controls (Risk and compliance overhead.) · Reuse Potential: Isolated - Foundational (Component or agent reuse.)

Current opportunity record

01 · Refund resolution · Demonstrate · 24 / 30

Reduce time to resolve approved refund requests without increasing disputed payments.

Value & Impact 5/5 · Feasibility 4/5 · Time to Evidence 4/5 · Adoption Friction 4/5 · Control Burden 3/5 · Reuse Potential 4/5 · Dependencies: Approved payment action and named owner. · Caveat: Review exception and fraud paths.

Interpretation

Refund resolution · Demonstrate

Significant adoption or control constraints require proving the capability in a restricted environment first.

Suggested delivery entry: IDAO stage review.

Next steps

01 Record uncertainty as a caveat and revisit a score when evidence, dependencies or ownership changes.

02 Bring the highest-value, best-evidenced opportunity to a separate Value Scan if a facilitated route to proof is useful.

03 Use Agent Authority separately when a consequential handover exists; Control Burden is not an authority ceiling.

Privacy and limitations

This is a transparent comparative planning tool, not a financial business case, ROI calculator or roadmap-to-delivery package.

Answers and free-text opportunity evidence were generated locally from this page and are not sent to Cognirise.
