

COGNIRISE PULSE · HANDOVER ASSESSMENT

Agent Authority Control Brief

Review a bounded invoice exception

Generated September 14, 2026

Result · Action handover · E2

The requested authority is within the calculated ceiling for this handover.

Answers remain on this page and are represented in the following evidence record.

Calculated authority

Reversibility

R2 · We undo it ourselves, inside a known window.

Reach

H2 · One named customer, patient, or citizen.

Exposure band

E2

Permitted ceiling

Out of the loop

Requested authority

Out of the loop

Comparison

Within the permitted ceiling.

Operating controls

Accountable owner

Accounts payable lead

Intervention window

Not required at this ceiling.

Promotion evidence

Reviewed test cases

Automatic demotion

New unexplained exceptions

Additional artefact / control

Not required for the requested authority.

Control instruction

Permit this action handover no further than out-of-loop. The requested authority is within the calculated ceiling. The Accounts payable lead owns promotion evidence and must demote authority automatically when:

New unexplained exceptions

Next steps

01 Carry this control brief into the operating design for the one assessed handover.

02 Reassess when the reach, reversibility, intervention window, artefact or accountable role changes.

03 Repeat the assessment for every other consequential handover; this brief does not set a ceiling for an entire agent.

Privacy and limitations

The questionnaire, calculation, exposure bands and authority rules are the approved Agent Authority Model and are unchanged.

This report was generated locally from this page. Answers were not sent to Cognirise or stored in the browser.

Method version: Agent Authority Model · current public questionnaire.
